NUMBERING

- Satin chrome number frame with black numbering on brass-colored insert.

DOORS

- Low maintenance .5" (1.3 cm) thick on edge.
- Solid aluminum alloy and textured powder coat finish

OPTIONS

KEYS AND LOCKS

- Restriction of Hazardous Substances (RoHS) - compliant in support of an environmentally friendly solution.

Security and convenience are enhanced by double changeable locks with computerized key security. Lock model number 175-70 is UL listed and includes seven tumblers and seven guard tumblers with brass finish.

Each side is independently changeable. A specially designed tool is provided with each LM Series Safety Deposit Box installation to ensure quick and accurate changing. Changing keys is done on site quickly and conveniently and does not require a service call. Using this special tool, the lock action is reset to fit a new key, making the box available immediately for a new customer.

LIGHTWEIGHT BOND BOX

Bond boxes are made of durable lightweight polypropylene which offers excellent durability, heat and impact resistance. Contoured corners won't cut fingers or scratch countertops. The latch requires positive pressure to release, minimizing the possibility of unintentional opening. Bond boxes are designed to carry 35 lbs. of contents.
