

# INTELLIGENT DEPOSITORY MODULE™

Accept multiple check, single check, and bill payment documents at the ATM.

Diebold's Intelligent Depository Module (IDM) is now available in single feed and bulk feed varieties. Both modules can accept and process checks and bill payment documents.

Diebold's Bulk Document Intelligent Depository Module – IDM<sub>BD</sub> – offers the same design, reliability, and features available on our fifth generation IDM, plus

- Accepts stacks of up to 30 checks or bill payment documents
- Accepts any insertion orientation for consumer ease of use. Can even process checks inserted face down.
- Consistent consumer interface – the IDM and IDM<sub>BD</sub> use the same insertion slot
- Ease of service – enhanced features support advanced deposit processing
- Supported on all Opteva terminals with factory and field installation options

Diebold's IDM<sub>BD</sub> gives Financial Institutions the flexibility to better serve high volume deposit sites and extend envelope free deposits to business customers.

**DIEBOLD®**

## Intelligent Depository Module™ Features

Turn to Diebold for a world-class check imaging solution. By eliminating the envelope from a check deposit, you enhance customer service and maximize the return on your self-service investment. Migrate deposit transactions from the teller line to the ATM. Prepare your self service channel to capitalize on the image processing opportunities made possible by check truncation.

- Accepts OCR documents for bill payment applications and codeline recognition
- Suspicious magnetic sensing reduces risk of accepting photocopied checks
- True double check detection ensures all checks are processed individually
- High capacity sequential check storage in lockable bin lengthens service intervals
- Exception bin allows separation of checks according to your business processes
- Flexibility to configure for multiple check orientations
- Optional stamp on front of check shows check was processed

## How It Works

- Accepts individual checks or stacks of up to 30 checks without an envelope
- Captures a high quality image of both sides of the check
- Reads courtesy amount without customer input
- Reads MICR line in E13B and CMC7 formats
- Displays check image and courtesy amount on screen for customer verification
- Checks are held in escrow and are returned if customer rejects transaction
- Prints transaction data on back of check
- Deposits check in a secure area, separate from ATM currency
- Can print check image on customer receipt
- Optional ImageWay™ solution lets you start clearing the check as soon as the transaction is completed

## Why Diebold?

With over 15 years of experience and continuous improvement, you can be assured of an exceptional level of reliability. Diebold's check imaging technology offers superior paper handling, document processing, and character recognition. The result is greater uptime, higher customer satisfaction, and the best overall value proposition.

**Reliability** – With a transport so robust it can accept crumpled, curled or creased checks, you can count on maximum availability.

**Enhanced Character Recognition** – Diebold's superior check imaging technology reduces keying errors and your risk of accepting fraudulent checks.

**Enhanced Security Features** – Incorporates the latest fraud-preventative mechanisms to reduce risk exposure.

**Check Truncation Enabled** – Captures a high quality check image of the front and back of the check for integration with ImageWay®, Diebold's image processing system.

**Installation Flexibility** – The modular construction of the Opteva™ and ix Series® terminals enables you to add Diebold's IDM™ solution at any time with unparalleled ease. IDM<sub>BD</sub> is supported on all Opteva terminals with factory and field installation options.

## Total Solutions

With smart integration of hardware, software, and expert services, Diebold can provide you with a comprehensive solution to manage your self-service delivery channels.
