- Low maintenance stainless steel doors and rust-resistant finish on all surfaces maintains an impressive appearance.
- UL-listed hangeable double-nose key locks or optional single-nose locks for self-service environments

**DIEBOLD**<sup>®</sup>

## Features

### Modular Sections

- Stackable interlocking sections in five sizes to accommodate any vault height.
- Interlocking mechanism features interlocking clips at rear, guide pins at front and vertical side screws to attach adjoining sections.

### Construction

- Welded area fabricated from galvanized steel.
- Plated front frame made of aluminum alloy material.
- Brass finish on hinges and lock noses.

### Locks

- UL-listed double-nose lock features seven customer tumblers and seven guard tumblers, each side independently changeable.
- Single-nose lock features seven, fixed customer tumblers.

### Numbering

- Satin chrome number frame with black tone numbers on brass-colored insert.

### Doors

- .5" (1.3 cm) thick on edge with stainless steel front.

## Options

### Keys and Locks

Security and convenience are enhanced by double changeable locks with computerized key security. Lock model number 175-70 is UL listed and includes seven tumblers and seven guard tumblers with brass finish.

Each side is independently changeable. A specially designed tool is provided with each LM 300 Safety Deposit Box installation to ensure quick and accurate changing. Changing keys is done on site quickly and conveniently and does not require a service call. Using this special tool, the lock action is reset to fit a new key, making the box available immediately for a new customer.

### Lightweight Bond Box

Bond boxes are made of durable lightweight polypropylene which offers excellent durability, heat and impact resistance. Contoured corners won't cut fingers or scratch countertops. The latch requires positive pressure to release, minimizing the possibility of unintentional opening. Bond boxes are designed to carry 35 lbs. of contents.
