Let's start a conversation about how ImageWay® Branch can reduce costs and support your business strategy. Please contact your Diebold representative, visit Diebold.com or call **1.800.806.6827**

IMAGEWAY® BRANCH

Comprehensive Payments & Imaging Solutions
that Streamline Branch Operations

BUILDING SOLUTIONS AROUND THE EVOLVING BRANCH

The Branch Continues to Dominate

As the branch remains the key contact center for the vast majority of consumers, financial institutions continue to look for ways to more cost effectively serve their customers so they may devote more attention to their retention and acquisition strategies. Reducing costs allows more funds to be spent on innovation. Innovation enhances competitiveness. ImageWay Branch can help you quickly reduce the costs associated with paper-based item processing. Leveraging the technology developed in Diebold ImageWay Branch, financial institutions are able to utilize this technology to lower their costs and accomplish their branch related objectives.

ImageWay Branch can be deployed as a stand-alone solution, or as a strategic component of an enterprise-wide distributed capture infrastructure that includes ATM and Remote Capture. The ImageWay family allows financial institutions to begin with the capture point solution of choice and move into an enterprise model at their own pace. Diebold's solutions are flexible and scalable, accommodating in-house and managed service implementations.

Branches continue to be visited on a monthly basis by 93% of US households.

The Benefits of ImageWay® Branch are Quickly Realized

- Eliminates costs associated with transporting checks to processing centers
- Creates more efficient image-based operations
- Extends geographic footprint by reducing transportation-based restrictions
- Offers low entry costs and quick ROI
- Smooth workflows by scanning deposits at different time intervals throughout the day
- Facilitates accelerated posting and funds availability
- Enables Financial Institutions to offer flexible delivery options for statements and access to check images
- Managed service model eliminates infrastructure related costs, enhances speed to market and allows Financial Institutions to pay as they go

Diebold Solutions are Customer-Centric... Your Needs Come First

Diebold ImageWay Branch uses a secure, browser-based, thin-client system with image-capture software and hardware allowing Financial Institutions to automate deposits. An easy to use interface and open architecture that is compatible with existing systems makes ImageWay Branch ready to go for rapid deployment and rapid return on investment.

Additional benefits include:

- Secure Internet access offers built in disaster recovery
- Complete archiving ability
- Earlier fraud and error detection
- Full service organization offering depot model replacement within 24 hours

While reliable, leading edge technology is critical and features that streamline operations are significant, the successful implementation of your distributed capture strategy truly hinges on the people you entrust. Your team of Diebold professionals if fully dedicated to providing world-class service and support through every phase. Relationships matter... your trust matters and we look forward to earning them both.

ImageWay® Branch Business Model

Critical components engrained into the Diebold ImageWay Branch solution include core-independence, quick and easy setup, a real time view into the status of distributed work, server options to support infrastructure investments and managed service options to enhance productivity and speed to market.
